OFFICE: 786 E 59th, 32208 Jacksonville Fl.

Ladies and Gentlemen!

Our company with European roots as well as origin, based in Miami, would like to offer you solutions in the field of lighting, **supply of autonomous energy systems, hurricane electricity security systems**, based on solar technologies.

WHAT WE DELIVER

We offer solutions that will provide you with electricity without using the power grid (autonomous system), lighting based on energy from solar panels in the form of **solar street lamps**.

None of these devices require connection to the power grid and the consent of the electric utility. Their advantage is that they work immediately after installation.

WHO WE ARE

Our European team with **14 years of experience** in the field of solar energy and its use is a **guarantee** of very good quality and is at your disposal.

Our motto: **RESPECT THE EARTH, RESPECT THE ENVIRONMENT, SAVE MONEY**

I wish you fruitful cooperation.

Jeffrey Smith

SOLAR FARM

FROM 5KW TO 10MW AND MORE

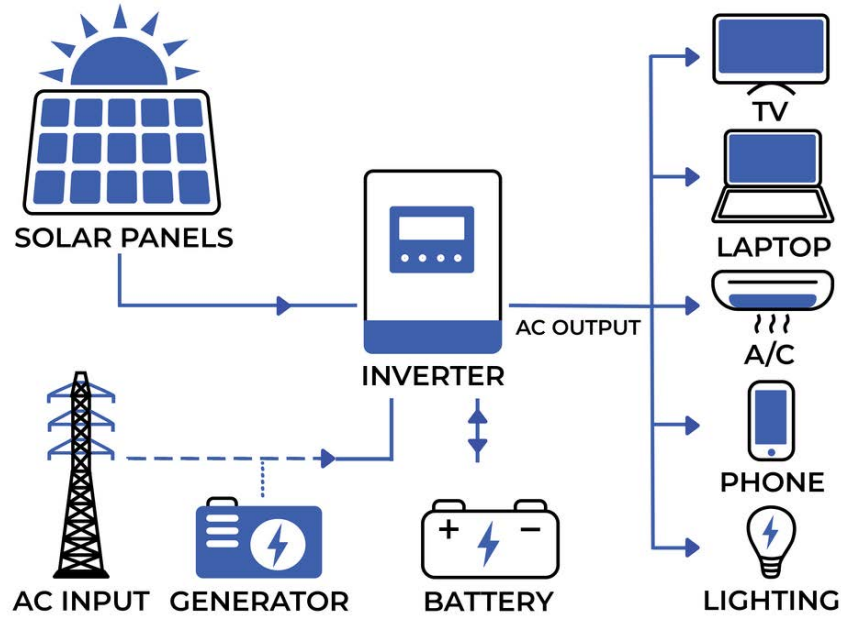

SOLAR FARM

Solar farms offer many benefits such as **cost savings, energy independence, long lifespan of the system** and **environmental impact**. Solar installations can also **increase the value of the property**.

Once installed, they can produce power for decades.

It's an excellent alternative solution for power distribution to **homes, businesses, and industries**.

HOW IT WORKS?
