Office: 786 E 59th str.32208 Jacksonville Fl.

WWW.LEDSYSTEMLLC.COM

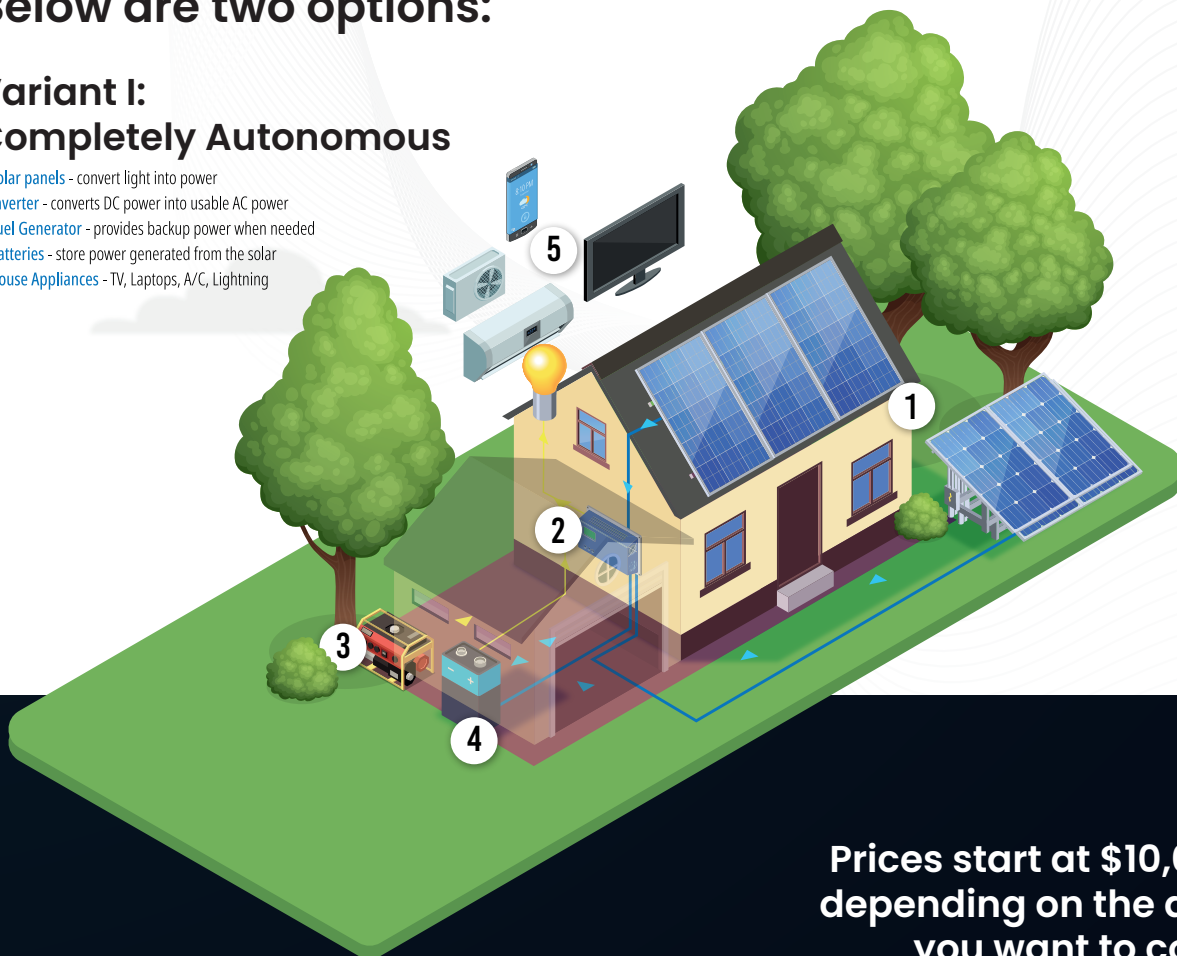

We have been dealing with renewable energy personally since 2009. We have extensive experience and many satisfied customers. We mainly operate in the European market, and since 2013, with a break during the pandemic, we have been present in the American market as Led System LLC.

Our main products include street lights, park lights, solar lamps, and off-grid solar systems that power residential houses with energy storage, completely independent of the power grid. If you want to build a house but don't have energy on your plot, no problem. We will supply electricity to your new home throughout the year, and you won't have any electricity bills.

Below are two options:

Variant I: Completely Autonomous

1. **Solar panels** - convert light into power
2. **Inverter** - converts DC power into usable AC power
3. **Fuel Generator** - provides backup power when needed
4. **Batteries** - store power generated from the solar
5. **House Appliances** - TV, Laptops, A/C, Lightning

**Prices start at \$10,000.00,
depending on the devices
you want to connect.**

Your Electricity for Free.

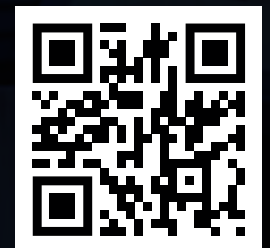

**Variant II:
With a Power Grid Reserve,
and prices starting
at \$6,000.00.**

- 1. **Solar panels** - convert light into power
- 2. **Inverter** - converts DC power into usable AC power
- 3. **Fuel Generator** - provides backup power when needed
- 4. **Batteries** - store power generated from the solar
- 5. **House Appliances** - TV, Laptops, A/C, Lightning
- 6. **AC Input**

Your Electricity for Free.

**We invite you
to cooperate.**
